Tyco Fire Suppression & Building Products Introduces the Only Fully Supervised, Self-Contained Electronic Dry Pipe Accelerator

Lansdale, PA (May 11, 2010) – Tyco Fire Suppression & Building Products is pleased to announce the release of its new VIZOR Electronic Dry Pipe Accelerator. The VIZOR Accelerator is a fully supervised, self-contained, riser-mounted, quick-opening device that reduces the time required to operate a dry pipe system with the activation of one or more automatic sprinklers. All essential components are located inside its enclosure making the VIZOR Accelerator easy to install, set, and maintain.

Advanced microprocessor technology enables the VIZOR Accelerator to monitor and control dry systems cleanly. There is no need for restricted orifices, strainers, diaphragms, anti-flooding components, and other troublesome devices that can clog, stick, and degrade over time.

The VIZOR Accelerator is approved for use with new or existing dry pipe systems and can replace mechanical-type accelerators. This product is available for purchase separately for retrofit applications on legacy GEM, STAR, and CENTRAL valves or bundled as a package with the TYCO Model DPV-1 Dry Pipe Valve trim.

Additional features of the VIZOR Accelerator include battery back-up in the event of a primary power failure, built-in low pressure and high-pressure alarm supervision, and a push-button test-and-rest function. The VIZOR Accelerator is UL and ULC Listed and FM Approved.

To learn more about how the VIZOR Electronic Dry Pipe Accelerator can simplify your dry system installations, contact your local Tyco Fire Suppression & Building Products territory manager or visit www.tyco-fire.com.

About Tyco Fire Suppression & Building Products

Tyco Fire Suppression & Building Products is a strategically aligned business unit with globally recognized products sold under leading brands including ANSUL, GRINNELL, HYGGOOD, PYRO-CHEM, RAPID RESPONSE, SKUM, and TYCO FIRE PRODUCTS. Tyco Fire Suppression & Building Products produces fire protection and ancillary building construction solutions for commercial, industrial, institutional, governmental, and residential customers.
